

PORTION CONTROLS FOR DRAFT BEER

DRAFT BEER PORTION CONTROLS

- Beer controls can be installed with a custom draft beer system or be added to an existing system
- Easybar electronics can control any number of brands
- Each brand is assigned 3 pour sizes
- Multiple beers can be poured at the same time
- Each pour is counted and dispensing information can be organized in valuable usage reports
- When used with Easybar CLCSII electronics, beer controls can ring up drinks on compatible POS systems
- Beer controls can be used in conjunction with all Easybar liquor control systems
- Complete control and accountability for all draft beer systems

EASYFLOW METERING SYSTEM

Easybar is now offering radio frequency flow metering systems! These systems report every ounce poured from your system to Easyflow metering software as well as to your POS reporting system. With every pull of the tap handle Easyflow will count the ounces being dispensed so that you can see exactly where your beer investment is going. **Accountability = Profitability**

Contact Easybar for more information on this new innovative system!
